

## CPCE “2+2” Articulation Pathways

The tables below show the mapping between HKCC and SPEED programmes.

Some PolyU-SPEED award programmes require students who do not have prior knowledge on specific subject areas to complete relevant foundation subject(s) on top of the basic programme requirements after admission. The foundation subject requirements of PolyU-SPEED award programmes, if any, together with the mapping of HKCC subjects with SPEED foundation subjects are also specified in the tables below. HKCC students may plan ahead their studies if they wish to articulate to SPEED programmes.

Foundation subjects of PolyU-SPEED award programmes are normally offered for the students concerned during their first year of study in SPEED. Students who are required to take foundation subject(s) and wish to complete all the programme requirements within the normal duration of study (i.e. 2 years for full-time study and 4 years for part-time study) will need to take additional study load in certain semester(s). Students, on admission to SPEED, will be provided with the recommended study patterns which can facilitate them to complete the programme requirements within the normal duration of study.

Remark:

*The offering of any programmes stated below is subject to annual review. There may be revamp, re-development and phasing out of programmes from time to time. At the same time, SPEED may develop new programmes as appropriate in response to community needs.*

HKCC
